

Provisional Coal Statistics 2023-24

Ministry of Coal — Coal Controller's Organisation (sample excerpt)

Chapter 3: Production

All India raw coal production during 2023-24 reached 997.83 million tonnes, compared with 893.19 million tonnes in 2022-23, a growth of 11.71 per cent. Coal India Limited contributed 773.81 million tonnes. The increase was driven by higher output from the large opencast mines of SECL and MCL, faster clearances for mine expansion, improved evacuation through first mile connectivity projects, and higher mechanisation with surface miners.

Chapter 4: Offtake

Raw coal offtake by CIL during 2023-24 was 753.50 million tonnes against 694.70 million tonnes in 2022-23. Supply to the power sector accounted for about 80 per cent of the offtake. Coal stocks at pitheads remained comfortable through the year owing to improved rake availability.
